Image-to-Video Prompt Tips for Grok Imagine xAI

Transform your static images into dynamic videos with these proven prompt strategies

1 Basic Prompt Words for Image-to-Video

Prompt = Subject + Motion, Background + Motion, Camera + Motion...

Essential Guidelines

Basic structure: Since text-to-video already has a scene, try to reduce (or even avoid) descriptions of static/unchanged parts.

Grok Imagine

Feature description: When the main body has some prominent features, add the prominent features to better position the main body, such as "an old man," "a woman wearing sunglasses," etc.

Follow the picture You need to write based on the content of the input picture, and you need to clearly write the main body and the action or mirror movement you want to do. **It is necessary to pay attention that the prompt words should not contradict the facts of the picture content/basic parameters. **For example, there is a man in the picture, and the prompt word says "a woman is dancing"; for example, the background is grassland, and the prompt word says "a man is singing in a coffee shop"; for example, there are no accessories on the hand, and the prompt word says "the hand with accessories"; for example, the basic parameter selects a fixed lens, but the camera surround is written in the prompt word.

Negative prompts do not take effect The model does not respond to negative prompts.

2 Multiple Consecutive Actions Prompt Words

3 Mirror Movement Prompt Words

4 Adverb of Degree
